

VPro Skills EduTech

Company Knowledge Document

About VPro Skills

VPro Skills EduTech is a practical technology training company focused on industry-ready skills. The company provides training for students, working professionals, and faculty members through practical, project-oriented learning.

Training Areas

Area	Topics
Programming	Python, Core Java, Data Structures and Algorithms
Web Development	HTML, CSS, JavaScript, React, Node.js, Full Stack Development
Generative AI	LLMs, Prompt Engineering, Generative AI applications
RAG	Naive RAG, Advanced RAG, Agentic RAG, Vector Databases
Agentic AI	AI Agents, Tool Calling, LangGraph, Multi-Agent Applications
Cloud & DevOps	AWS, Docker, CI/CD, Jenkins and deployment concepts

Learning Approach

VPro Skills emphasizes simple explanations, hands-on coding, real-world use cases, projects, interview preparation, and deployment-oriented learning. Training is designed to help learners move from fundamentals to practical industry applications.

Generative AI and Agentic AI Programs

The Generative AI and Agentic AI learning path covers Python foundations, LLM concepts, prompt engineering, embeddings, vector databases, RAG, Advanced RAG, Agentic RAG, LangChain, LangGraph, tool calling, and application deployment.

RAG Workshop

VPro Skills conducts practical RAG workshops covering document ingestion, chunking, embeddings, vector databases, retrieval, LLM integration, Advanced RAG techniques, and Agentic RAG concepts.

Practical Technologies

Common technologies used in training and projects include Python, FastAPI, React, LangChain, LangGraph, ChromaDB, FAISS, Pinecone, Anthropic Claude, Docker, Jenkins, AWS, and related modern AI development tools.

Example Questions for the Agent

- What technologies does VPro Skills teach?
- What is covered in the Generative AI and Agentic AI program?
- Does VPro Skills teach RAG?
- Which vector databases are mentioned in the training?
- What is the company's learning approach?
- What technologies are used for AI application development?
